Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 February 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by **Cotichini et al. (6,300,863)**.

Regarding claims 1, 9 and 15 Cotichini discloses a method, a system and a program product for tracing an electronic device transmitting identifying indicia over a global network, the electronic device connectable to a network server through the global network (see Figs. 1 and 7B), the method comprising the steps of: determining identifying indicia for the electronic device that are transmitted by the electronic device during communications over the global network (see col. 10, lines 15-26, col. 11, lines 32-50), automatically monitoring communications over the global network to identify

Art Unit: 2686

data transmitted through the global network to identify data transmitted through the global network that contains the identifying indicia (see col. 11, line 65 to col. 12, line 4), and upon identification of data transmitted through the global network that contains the identifying indicia, determining the location of the electronic device by tracing the source of the identifying indicia within the global network (see col. 12, lines 4-18).

Regarding claims 2, 10, and 16 Contichini further discloses wherein the global network includes Internet (see Internet application, col. 11, lines 32-32-34).

Regarding claims 3, 11, and 17 Contichini further discloses determining the identifying indicia by extracting the identifying indicia from data previously transmitted by the electronic device and stored on the global network (see col. 11, lines 51-64).

Regarding claims 4, 12, and 18, Contichini further discloses wherein the indicia is the MAC address of the electronic device (see col. 16, lines 37-42).

Regarding claims 5 and 13, Contichini further discloses wherein the identifying indicia is determined by indexing a known host name or IP address of the electronic device contained within data previously transmitted by the electronic device and stored on the global network (see col. 11, lines 51-64).

Regarding claim 6, Contichini further discloses providing the network server with one or more global network communication links used to enable transmission between the electronic device and the network server, wherein the transmission via the communication links is used for determining the location of the electronic device (see col. 16, lines 53-65).

Art Unit: 2686

Regarding claims 7, 14 and 19 Contichini further discloses entering the identifying indicia into a database stored in the network server and performing a matching function on the network server that compares the data transmitted over the global network with the database to identify transmitted data containing the identifying indicia (see col. 26, lines 48-62).

Regarding claims 8 and 20, Contichini further discloses that upon identification of data transmitted through the global network that contains the identifying indicia, notifying a responsible party that data transmitted through the global network contains the identifying indicia (see col. 27, lines 8-34).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Koodli (6,571,095) discloses a system for providing address discovery of services in mobile networks.
